A. PERSONAL PARTICULARS

Full Name: TRUONG DAI HAI RUNG

Age: 25

Gender: Male

Phone: 0962.49.46.47

Email: rung.iuh@gmail.com

Website: https://rungtruong.github.io/

Nationality: VIET NAM

Country of Residence: VIET NAM

Summary:

Hi, My name's Rung, I'm a Web Developer with 1^+ years of experience in frontend development. I build websites and "make it awesome". I graduated with honors in Cybersoft Academy.

Objectives:

Get a new job in a professional environment. Take advantage of the knowledge and experience that I have to help the company grow.

The work on the Web Front End brought me a lot of fun, arousing passion in the work. I'm ready to learn new languages, new technologies to improve myself and meet the needs of work.

I know the company is looking for friends, reliable partners and I am ready to go along with the company on the upcoming long trips.

Furthermore, I want to become a developer with good skills, passionate to be a role model for everyone to follow.

Interests: I like to play soccer, listen to music,…

E. PROFILE

(Brief description of past and present work portfolio and experience in implementing similar services)

I have undergone 7 projects using the angular framework, including projects such as movie ticket sales site, the portal website to manage information, user, access,..., and landing page website.

- Project:
  - Name: Website movie ticket sales
  - Academy: Cybersoft Academy
  - Role: Front End Developer
  - Technology: Angular 6, Rest API,...
  - Descriptions: In the project, I design UI for home page and admin management page and binding data from the server via API. The project helped me understand more about RestAPI, Guard, and Authentication.

- Project:
  - Name: The portal website for 5 projects
  - Company: Styl Solutions PTE. LTD. in HCMC
  - Role: Front End Developer
  - Technology: Angular 4^+, Rest API, Authentication,...
  - Descriptions: I design UI for the admin page management, setting, statistical and graphing of graphs the data from the server. I understand more about folder structure, JWT, binding data via access level, guard routing,...through that project.

- Project:
  - Name: Website E-Commerce
  - Company: Styl Solutions PTE. LTD. in HCMC
  - Role: Front-End Developer
  - Technology: Opencart, SASS, JS

- ○ Descriptions: I custom theme for UI. The project helped me understand more about PHP, TWIG and MVC model.

- Project:
    - ○ Name: The Landing page
    - ○ Company: VillamTech Company (VILLAM., JSC)
    - ○ Role: Full-stack developer
    - ○ Technology: Angular 7, Rest API, NodeJS, Express, MongoDB/ Mongoose
    - ○ Descriptions: With the back-end, I used NodeJS to code API and MongoDB for saving data. The front-end I used the Angular framework, I design UI for landing page and admin management page then binding data from the server via API. The project helped me understand more about Express, Middleware, JWT, Mongoose,…
